ZEE-TECH ACADEMY

CERTIFICATE

OF COURSE COMPLETION

TO WHOMSOEVER IT MAY CONCERN

This is to certify that

Iqra Mohd Rafique Pawaskar

hassuccessfullycompleted the ***4-MonthDataAnalyst*** course atZeetech Academy. The candidate has demonstrated dedication, consistency, and a strong understanding ofall modules

COURSE MODULES COVERED

1. Python Programming
Learn Python fundamentals, OOP, file handling, APIs, libraries, and automation.

2. SQL
Master database querying with joins, subqueries, window functions, and stored procedures.

3. Pandas & NumPy
Perform data cleaning, manipulation, analysis, and numerical computing.

4. Tableau
Create interactive dashboards, visualizations, and data stories.

5. Power BI
Build business intelligence reports using DAX, Power Query, and dashboards.

6. Excel
Analyze data with Pivot Tables, lookup functions, charts, and advanced formulas.

COMPLETED With EXCELLENCE

ZEE-TECH ACADEMY

CERTIFICATE

OF COURSE COMPLETION

PROJECTS COVERED

SQL & Database

- Database Design & Management – Created and managed relational databases efficiently.
- SQL Joins & Queries – Retrieved and analyzed data using Joins, Subqueries, and Window Functions.
- CRUD Operations – Performed Create, Read, Update, and Delete operations on databases.
- Stored Procedures & Triggers – Automated database processes and reusable SQL procedures.

Python Development

- Object-Oriented Programming (OOP) – Developed applications using classes, objects, and inheritance.
- Banking Management System – Built a Python-based banking application with transaction handling.

Excel

- Data Analysis & Reporting – Analyzed business data using Excel functions and formulas.
- Pivot Tables & Charts – Created interactive reports and visual dashboards.
- Lookup Functions – Implemented VLOOKUP, HLOOKUP, XLOOKUP, and INDEX-MATCH functions.
- Excel Automation – Automated data processing and reporting using OpenPyXL.

Tableau

- Interactive Dashboards – Designed dynamic dashboards for business insights.
- Data Visualization – Created charts, graphs, and KPI-based reports.
- Data Storytelling – Presented complex datasets through meaningful visual stories.
- Filters & Calculated Fields – Enhanced reporting with interactive filters and calculations.

Power BI

- Business Intelligence Dashboards – Developed interactive dashboards and reports.
- Power Query – Performed data cleaning, transformation, and preparation.
- DAX Functions – Created measures, calculated columns, and KPIs using DAX.
- Data Modeling – Built relationships and optimized data models for reporting.
